

# HAMSR first flight

Submitted by **blambrigtsen** on Sat, 08/28/2010 - 17:13

- **HAMSR**

Flight Date:

Sunday, August 15, 2010

HAMSR worked almost flawlessly during the low-altitude range flight. Three channels exhibited intermittent problems, but it turned out to be easily fixed after the flight. During the flight we were able to generate real-time quicklook images, which were projected on one of the large video screens in the GHOC.

The sample images show select brightness temperatures "draped" over topography in Google Earth.

Status:

Green
